DE ORDINE CORDARUM NOMINIBUS Q; INTRIBUS GENERIBUS

Nunc igitur ordo chordarū disponendus ÷ omnium quae per tria genera unantur uel inconstanti ordine disponunt, Prima ÷ igitur pr lamba nomenos quae eadem dr psmelodos. Secunda hrpate hrpaton, Tertia per hrpate hrpaton. Quarta uero uniuersaliter quidem lichanos appellatur; Sed si in dratono genere aptetur dicit lichanos hrpaton dratonos, Si uero inchromate dr diatonos chromatice uel lichanos hrpaton chromatice; Si autem inenarmonio dicit lichanos hrpaton enarmonios uel diatonos hrpaton enermonios, Posthanc uocatur hrpatemeson. Dehinc par hrpatemeson, Atque hinc lichanos meson simpliciter. In diatono quidem genere diatonos meson. In chromate lichanos meson chromatice t diatonos meson chromatice. In enarmonio diatonos meson enarmonios. Et has sequitur mese. Posthanc sunt duo thethracorda partim sinemmenon partim die zeugmenon, & sinemmenon e. qd post mesen ponitur id ÷ trite sinemmenon. Dehinc sinemmenon, eadem in diatono. Diatono

Si uero mese neruo nonsit sinemmenon thethrachordum adiunctū. Sed sit die zeugmenon est post mesen paramese; Dehinc trite die zeugmenon. inde lichanos die zeumenon quae in diatono diatonos die zeugmenon inchromate. Tum diathonos die zeugmenon chromatice, Tum lichanos die zeugmenon chromatice. In enarmonio uero tum diathonos die zeugmenon enarmonios. Tum lichanos die zeugmenon enarmenios, eadem uero dr & paranae cū additione ut diatoni t chromatis t enarmonii, Super has nae die zeugmenon trite hrpboleon & quae est paranae hrpboleon. Eadem in diathono diatonos hrpboleon. In chromate uero chromatice hrpboleon. In enarmonio uero enarmonios hrpboleon. harum ultima ea ÷ quae est nae hrp hrboleon. & sit discriptio eiusmodi utriu generum contineat dispositionem. In quibus & similitudinem nominū & differentia

sinemmenos; In chromate uero t diatonos sinemmenon chromatice. t lichanos sinemmenon chromatice. In enarmonio uero t diatonos sinem.
